

I am Julian Hundeloh,
a passionate SAP and full-stack developer with focus on CRM, UX and Mobility.

Advise. Develop. Lead.

I am a strong team player who was with [SAP SE](#) in CRM, User Experience and Mobility consulting for 9 years. Since 2000 I have gained deep experience in a variety of technologies and numerous projects with intercultural teams and different company sizes. Given this broad skill set I can support you along the whole implementation cycle - from the definition of architecture and actual development to testing, end-user training and safe deployment in production. As technical skills alone are not the key to success I am a vigorous proponent of open communication during all stages of projects.

Are you looking for...

- ... a lead developer who can independently guide a team of (distributed) developers to success?
- ... an SAP expert with excellent cross-topic skills to plan and implement applications in a team or alone?
- ... a certified coach for SAP Fiori, SAP Gateway, SAP CRM, SAP HANA or SAP Cloud Platform who helps your team to get into gear?
- ... a trainer for developer or end-user trainings?
- ... a JavaScript expert who knows how to implement performant client and server applications?
- ... a cross topic expert who can identify performance or security potential in your applications?

This list is not exhaustive - I will be happy to discuss your requirements in detail. Please get in touch with me.

german	NATIVE	french	BASIC
english	ADVANCED		

Recent projects

AP Invoice Processing

[Lead Developer](#) of a lighthouse project that combines SAP Fiori and SAP Screen Personas in parallel in order to increase the efficiency of the invoice processing processes at the largest food company in the world. Additionally, Smart Business applications with custom SAP HANA views were developed.

My Approvals

[Lead Developer and Architect](#) of an extensive framework for a custom [My Inbox](#) Fiori application that is designed to be a one stop shop for approvals in one of the largest pharma companies of the world. Part of the project was also a custom UI5 template framework that supports different views for different types of approvals. Additional proof of concepts were implemented to have push notifications and offline capability.

KPI Dashboard on SAP CP

[Lead Developer](#) of an high performant KPI dashboard application for board members of one of the biggest insurance companies in the world. This Fiori application makes use of OData services exposed via HANA XS on SAP Cloud Platform.

Fiori Launchpad XXL

[Lead Developer](#) in one of the largest SAP Fiori Launchpad rollouts worldwide. The Launchpad is designed to be the central entry point for employees for any HR related topic. Various custom implementations were necessary, e.g. an improved personalization concept, a fine granular authorization concept and the integration of apps residing on different servers. The total number of users is over 100.000.

Hybrid Requisition Approvals

[Lead Developer and Coach](#) of a packaged [Approve Requisitions](#) Fiori application at the largest telecommunication company of the Philippines. The application is wrapped in a SAP Fiori Client and targets iOS and Android devices. Custom adaptations of the SAP Fiori Client were necessary to support custom SAML authentication behaviour and to have an offline mode while using the application in remote locations.

CRM for Football

[Lead Developer and Coach](#) of the SAP CRM on HANA implementation at Germany's largest football association. The focus was on Activity and Campaign Management to efficiently manage event invitations and make this as smooth as possible for VIPs.
